

Please add my voice to the many requesting common-sense gun violence legislation in the state of Connecticut. I support universal background checks, a ban on military-style assault weapons, and a ban on the possession of high-capacity magazine rounds. No private citizen needs access to any machines or materials of this nature to be secure in their 2nd Amendment rights. These kinds of things have no use in any civilian setting. Required background checks do not take away the right to bear arms but make the owners responsible for their ownership--hardly a burden.

Thank you!
